

72P POLY-TRUX[®] with Lid and Door option

PRODUCT INFO SHEET

The latest version of our pioneering 72P delivers larger volumes than ever on the same footprint. Shown with optional, lockable security lid and door.

Meese manufactures the 72P on the most sophisticated rotational molding system in the world.

72P is available with an extra-low, ergonomic front cutaway.

Overview: This often-imitated Poly-Trux bulk cart is the standard by which all other carts are judged. In the 70's, Meese designed and trademarked the Poly-Trux[®] line of carts, starting with the 70P, to directly meet the needs of their laundry customers. Meese then went and made the best even better by introducing the 72P, a taller version of the 70P built with the same strength and functionality of the original, but designed to maximize even more space. Although many companies claim to offer the 72P, Meese is the only company that offers the true original.

Benefits: Its rugged construction, reinforced base, and high quality casters make it still the best cart on the market. The 72P has an optional lockable lid and door to deter theft and secure goods during transport and storage. Its body, lids and doors are made of the stronger and lighter High Density Polyethylene (HDPE) compared to competitors that use Linear Low Density Polyethylene (LLDPE) for the body and inferior ABS plastic for lids and doors. And the 72P, like all Meese carts, has a metal free interior to avoid snags and tears.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density polyethylene (HDPE)
- Rotationally molded, smooth poly base
- Torque-resistant, molded-in inserts
- Four 6" x 2", gray, rubber, non-marking casters
- Hand holes

Featured Options
