

Overview: The 70P Biohazard Poly-Trux has the same rugged body construction, reinforced base and high quality casters as the 70P with the added benefit of the Biohazard feature uniquely created for use in hospitals, medical clinics and other places where biohazardous waste is a threat

Benefits: The 70P Biohazard has the same body type as the 72P but is slightly shorter, making it preferred by some customers dealing with size constraints. The 70P Biohazard creates a necessary barrier between soiled linens and human contact. It features special designated hinged "Biohazard" placards riveted in recesses of the cart on both front and back to ensure they don't get snagged or accidentally pulled off. The placard flips down to signify the cart is clean and flips up to indicate biohazard material is in the cart. The cart is easily identified in Biohazard red or orange. The 70P Biohazard has an optional rotomolded lockable lid and door to deter theft and secure goods during transport and storage. Its body is made of the stronger and lighter High Density Polyethylene (HDPE) compared to competitors that use Linear Low Density Polyethylene (LLDPE). And the 70P Biohazard, like all Meese carts, has a metal free interior to avoid snags and tears.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- Torque-resistant, molded-in inserts
- Metal free interior
- Heavy duty powder coated steel base
- Four 6"x 2," gray, rubber, non-marking premium casters
