

The P-433 bulk forklift container handles large loads of products with convenient, four-way lift access.

P433 unitizes loads without pallets, cubes out trucks.

Smooth interior promotes complete emptying.

Overview: This rugged, durable bulk container, similar to the P333, is made of High Density Polyethylene (HDPE) and has unique loading and unloading features for even greater ease of use.

Benefits: Built with forklift slots on all 4 sides, forklift drivers can locate access points quickly from any side without using their forks to rotate the container, potentially causing damage. Also, team members no longer need to think about how to position the container when loading or stacking. They stack 2 high filled and covered and nest when empty without jamming together.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- Durable, removable, companion lid
- Four-way fork access
- Smooth interior for complete emptying

Featured Options

- Stencil, Mold-in or Mold-on text, logos or graphics
- Industrial-strength casters
- Fork safety tubes
- Drain holes
- Hinged access panel
