

Our P341 bulk container features molded projections on two sides that help container dumpers establish a firm, non-slip grip. Rotate up to 180 degrees for complete emptying.

With a smooth interior and two-way fork access, the P341 unitizes loads to eliminate the need for pallets. Stack and nest for efficient storage and transport.

Overview: This heavy-duty bulk container, taller than the P340, is designed to suit virtually any type of application with its firm non-slip grip and secure hold even while rotating up to 180 degrees. A special and exclusive metal additive has been added to this product to ensure that any potential poly contamination in a food product is easily detectable. It ensures proper adherence to HACCP (Hazard Analysis Critical Control Point) programs to prevent plastic contaminated products from reaching the consumer.

Benefits: The P341 withstands repeated filling with sharp heavy and hard products with no cracking, chipping or discoloring. The smooth-contoured interior ensures complete emptying and easy cleaning. It has two way fork access, stacks covered, and nests when empty. Adds protection against potential poly contamination.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- Durable, removable, companion lid
- Two-way fork access
- Smooth interior for complete emptying

Featured Options (May affect shipping weight)

- Stencil, Mold-in or Mold-on text, logos or graphics
- Industrial-strength casters
- Fork safety tubes
- Drain holes
- Lockable, hinged cover
- Casters
- Tilt-dump plates

Dimensions Top, Outside: 47" x 47" Overall Height: 44¼" covered

Capacity 33.4 cubic feet

Load Capacity 1500 lbs.

Shipping Weight 116 lbs. for standard part only
