

Overview: The P390 is a sanitary bulk, all plastic, easy-to-clean, efficient-to-ship container perfect for use by food manufacturers. The P390 is slightly taller than the P360. A special and exclusive metal additive has been added to this product to ensure that any potential poly contamination in a food product is easily detectable. It ensures proper adherence to HACCP (Hazard Analysis Critical Control Point) programs to prevent plastic contaminated products from reaching the consumer.

Benefits: The P390 is ideal for sanitary storage and secure transport throughout any processing facility loop. The smooth plastic, with no internal pockets, dimples or reservoirs, is easy to clean and immune to attack from cleansers, salts, water and other chemicals for wash-down. The smooth, flat interior also minimizes bruising to the food products to maintain food product quality throughout the supply chain. The P390 stacks easily when covered, nests when empty and is made of FDA/USDA-approved material for food contact. Adds protection against potential poly contamination.

Standard Features

- FDA/USDA approved material
- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- All assembly parts are plastic
- (4) way lift access
- Removable plastic base
- Unitizes loads without pallets
- Durable, removable, companion lid
- Lid design adds strength & stability
- Tub has a flat interior bottom

Featured Options

- Lockable lid all (4) sides
- Drain plug allows for easy clean up
- Stencil, Mold-in or Mold-on text, logos or graphics
- Color coding of base, lid, or body per customer requirements

Dimensions Top, Outside: 50" x 45" Overall Height: 39¼" covered

Capacity 32 cubic feet

Load Capacity 2000 lbs.

Shipping Weight 159 lbs. for standard part only
