

MRS 30 Front view / MRS 30 Drain valve

Inside view

**Overview:** This efficient container automatically separates and collects liquids from solids, to allow for easier and efficient collection for reuse and recycling.

**Benefits:** This self-contained, solid-liquid separation system collects and accumulates a wide range of scrap, waste and recyclable materials using a proprietary screening panel that captures the solids while liquids are safely contained in the bottom until ready to be drained. When full, it may be drained and covered, hauled away and replaced with another unit or emptied and returned to operation. The liquids are easily recovered and reused while the solids are collected in a form that's cleaner and easier to scrap. Also, it helps prevent solids from contaminating the waste stream at the outset and reduces the burden on the filtration system.

**Standard Features**

- Double Wall rotationally molded from waterproof, chemical-resistant polyethylene (HDPE)
- Polyethylene Strainer plate installed allows for fluid recovery
- Fork Bars installed for ease of lifting
- 3/4" FPT Banjo Valve mounts flush with part does not protrude outward from container.
- Utilizes loads without pallets
- Lid design adds strength and stability
- Container has a flat interior bottom
- 100% Weather proof
- Chemical resistant polyethylene

**Featured Options** (May affect shipping weight)

- Lockable lid (4) sides
- Stencil, Mold-in or Mold-on text, logos or graphics
- Casters for mobility
- Stencil, Mold-in or Mold-on text, logos or graphics

**Dimensions** Outside Dimensions with lid 45.5" x 45.5" x 44.25"  
 Outside Dimensions with out lid 44"x 44"x44"

**Total Capacity** 30 cu. ft<sup>3</sup>

**Capacity** 2000 lbs maximum load

**Capacity under screen** 20 Gallons

Stackable(3) high total

**Shipping weight** 203 lbs

Stackable Containers (2) high in trailer (2) stacks across

(52) per standard trailer

(1) MRS 30 part freight class 250
