

This industrial work table stands at a comfortable 30 inches high to ensure work is ergonomically positioned. It's rotationally molded from smooth, waterproof, sanitary plastic and does not splinter or rot like wood or rust like metal.

Our table is set on industrial strength casters for easy rolling anywhere in the facility.

Wings rise from each side to corral work on the table. Molded-in hand holes promote easy movement.

Overview: This heavy duty, durable and versatile sorting table is meant to handle anything from sorting e-scrap components to 200 pound slings dropped from a ceiling in a laundry.

Benefits: The sorting table's unique sorting functionality makes it perfect for any sorting task. Commonly used in laundry, recycling and materials handling, it has heavy duty roto-molded legs to allow it to handle significant impact without stopping production. **Optional leg braces are available for extra support for really heavy duty jobs.**

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density polyethylene (HDPE)
- Wings rise from three sides
- Hand holes both sides
- Four 5" swiveling casters, two with side lock brakes
- Molded-in inserts

Featured Options (May affect shipping weight)
