

Q: How long has Meese been making material handling products?

A: Meese manufactured the first plastic laundry cart in 1970, appropriately named the 70P. That's more than 50 years in the business!

Q: Are Meese carts and trucks made in the USA?

A: Yes, all Meese carts and trucks are exclusively made in the US in many plants located throughout the US. This is especially important because it means we can offer more efficient and affordable shipping for our customers.

Q: How many manufacturing locations does Meese have in the US?

A: Meese currently has 8 locations located throughout in US, with more on the way. [Click here to see where they are.](#)

Q: What industries are Meese carts and trucks used in?

A: Meese carts and trucks are used in variety of industries including laundry, healthcare, hospitality, recycling, construction, janitorial, and food processing, to name a few.

Q: What are Meese carts and trucks made of?

A: HDPE, (High Density Polyethylene). It is strong and built to last and, because it is

lighter than other materials, it saves you money on shipping. And it is easy to clean and sanitary due to its non-porous surface.

Q: What type of rotomolding machines does Meese use?

A: Meese was the first rotomolder in North America to invest in fully automated rotational molding systems. Our rotomolding machines produce parts more efficiently with less waste, combined with the ability to control extremely tight tolerances. Across all of our companies, we use a wide variety of rotomolding equipment from conventional carousel ovens to classic open flame ovens. We even have fully automated rotomolding ovens to ensure that we can meet any customer's product need.

Q: What size order does Meese deliver?

A: Meese can deliver orders of all sizes, from single carts to hundreds. Contact our sales team for more info@sales@meese-inc.com

Q: Does Meese offer a Warranty on their products?

A: Yes, in fact our 5 year limited warranty is the best in the business. [Click here to learn more:](#)

Q: How active are Meese sales people in the sales process?

A: Very. In fact, Meese will send a field sales rep to your plant and allow a test drive

before ordering, if needed. And they will survey your facility and provide a recommendation to help your operation run more efficiently and effectively.

Q: Do Meese carts and trucks come in a variety of sizes?

A: Yes! They come in virtually any size you might need. Whether delivering clean linens on a Shelf-Trux or returning heavy wet laundry for cleaning or collecting hundreds of pounds of recycling or construction materials, Meese can accommodate your needs. Our products come in many sizes to fit your space constraints and handle your shipping limitations.

Q: Does Meese have a Cart Safety Program?

A: The Meese team is well versed in the best ways to properly and safely use our products. Because each facility is different, our sales team will come to you and help develop a Cart Safety Program tailored specifically to your operation.

Q: How important is safety to Meese?

A: Very! Meese has a full line of ergonomic products designed to better protect the safety of your team members. We want to help avoid unnecessary injuries, missed work days and workers comp claims. With special features like spring-loaded platforms and ergonomic cutouts to make loading and unloading easier, **Meese ERGO** products can help.

Meese carts can also be protected with the development of Silva-Trux technology. **Meese Silva-Trux** are the first and only proven antimicrobial Poly-Trux on the market. The Meese Silva-Trux line offers an enhanced layer of protection to stop microbial growth and protects from deterioration caused by mold and mildew.

Q: What makes Meese carts better than carts from other manufacturers?

A: Meese provides the best value in the industry. Our carts are manufactured with decades of experience and stand the test of time. From the plastic to the components, we only use the highest quality materials with our time tested manufacturing expertise that has been passed down for generations.

Q: Does Meese use recycled plastic?

A: Meese is very environmentally conscious and we only use polyethylene that can be properly recycled. We also utilize recycled plastic material in our manufacturing process and offer a recycling program to all of our customers so they can safely recycle used carts with us rather than sending them to a landfill.
