

The 90 comes with wire shelves but can be upgraded to plastic shelves that easily shift into a vertical position for quick conversion to a rolling, bulk laundry bin.

Overview: The 90 Shelf-Trux are built to handle everyday wear and tear. They are rugged, versatile, popular and often-imitated shelf trucks preferred by many hospitals and healthcare clinics around the country due to their practicality, strength and durability.

Benefits: The original "Roundtripper," the 90 series started a movement with convertible shelf carts. The 90 comes standard with removable wire shelves perfect for delivering folded goods, cleanly and efficiently. When empty, these shelves can be converted to the soiled position to form a "wall," making the transportation of soiled linens cleaner and easier within the hospital setting. It is made of the stronger and lighter High Density Polyethylene (HDPE) compared to Linear Low Density Polyethylene (LLDPE), common with many competitors. And the 90, like all Meese carts, has a metal free interior to avoid snags and tears.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- Torque resistant molded-in inserts
