

The 100P features an internal rib design that nearly doubles the strength and load-bearing capacity vs. other carts on the same footprint.

100P displays solid and sturdy disposition with modern visual appeal.

Overview: The rugged, versatile 100P is a solid, heavy duty, long-lasting shelf truck designed to operate under even the toughest conditions in a variety of situations.

Benefits: The 100P comes standard with easy-to-clean, ventilated all-poly shelves that are quickly and easily converted from the clean position to the soil position and back with barely any effort. The wall thickness, wraparound steel rim support, and industrial grade casters make this cart extra durable and able to handle large, daily loads with ease. It is made of the stronger and lighter High Density Polyethylene (HDPE) compared to Linear Low Density Polyethylene (LLDPE), common with many competitors. And the 100P, like all Meese carts, has a metal free interior to avoid snags, tears and rust stains.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density Polyethylene (HDPE)
- Rotationally molded, smooth poly base
- Torque-resistant, molded-in inserts
- Two, removable, ventilated, plastic shelves in colonial white
