

The 54P40 flare truck is engineered with a series of internal support ribs and a powder coated steel base set on six, industrial-strength casters as standard to provide an impressive load capacity of up to 1200 lbs.

Our 54P40E comes with all of the 54P40 standard features plus an ergonomic sidewall. (not shown here)

The 54P40 spans nearly seven feet in length to hold large volumes of goods yet offers a comfortable working height of just 32 inches.

Overview: These durable Utility-Trux are large, rugged and efficient carts designed for a number of applications in various industries including laundry, material handling, e-scrap and ecommerce fulfillment.

Benefits: Their waterproof, rugged, low-center-of-gravity body and industrial strength swivel casters make the 54P40 Utility-Trux easy to roll, easy to maneuver and able to withstand heavy loads. The ribs and solid rim across the top of all four walls provides added strength to these nestable Utility-Trux. Great for linen drops from either slings or dryers, these units are designed to take a beating while also being a safe and ergonomic in-plant option. As an added ergonomic option, the 54P40E features a lower cut out in one of the walls to provide better accessibility for team members. It is made of the stronger and lighter High Density Polyethylene (HDPE) compared to Linear Low Density Polyethylene (LLDPE), common with many competitors. And the 54P40, like all Meese carts, has a metal free interior to avoid leaks, snags, tears and damage to the contents of the cart.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density polyethylene (HDPE)
- Heavy duty powder coated steel base
- Two 5" hard rubber non-marking casters (rigid in center) with four, 4" swiveling at ends
- Torque-resistant, molded-in inserts

Featured Options

- Stencil, Mold-in or Mold-on text, logos or graphics
- Custom caster sizes, materials, configurations
