

The versatile 39-12 is rotationally molded for long-lasting durability in a variety of facilities, indoors and outdoors.

The 39-12 is available with our ergonomic, springloaded platform that rises to reduce bending and reaching.

For extra load-bearing strength, the 39-12 includes galvanized, metal bases as standard.

Overview: The multi-purpose 39-12 Utility-Trux is an ergonomic, economical and dependable option for laundries, hospitals, hotels, health clubs, aquatic facilities, and industrial facilities.

Benefits: The rounded roll-top rim combined with a pan metal base on this light duty unit helps keep team members safe and productive. The optional spring-platform adds to the versatility of these Utility-Trux while supporting ergonomics on the job. The 39-12 Utility-Trux can be fitted with a hanging spring-loaded platform that rises as goods are removed to keep work positioned at the right height and reduce bending and reaching. The spring platform encases smooth, waterproof vinyl around a rigid, plywood platform to handle a variety of products. All 39-12 nests when empty for space-saving storage and transport. It is made of the stronger and lighter High Density Polyethylene (HDPE) compared to Linear Low Density Polyethylene (LLDPE), common with many competitors. And the 39-12, like all Meese carts, has a metal free interior to avoid leaks, snags, tears, and damage to the contents of the cart.

Standard Features

- Rotationally molded from waterproof, chemical-resistant High Density polyethylene (HDPE)
- Rounded, roll-top safety rim
- Galvanized metal base, flat (12 Bu)
- 3" hard rubber non-marking all (swivel) casters

Featured Options

- Removable spring-loaded platform
- Stencil, Mold-in or Mold-on text, logos or graphics
