

Double Rod Relay Cart

Overview: Maximize your transport efficiency with the Double Rod Relay Cart, the ultimate high-capacity solution for demanding commercial laundry, uniform, and industrial services. Engineered for massive-scale operations, this cart takes vertical space utilization to the next level, allowing you to transport twice the number of hung garments without sacrificing floor space.

The cart features an innovative two-tier hanging rod system, perfect for maximizing the transport of shorter garments like shirts, jackets, and trousers. The lower section retains a secure wire-mesh basket, providing flexible storage for folded linens, towels, or bulk laundry bags alongside your pressed items.

Benefits: Maximize efficiency with the Double Rod Relay Cart, featuring an extreme 3,000 lbs capacity and smooth-gliding heavy-duty casters. Its dual-tier hanging system doubles your garment space to keep clothes wrinkle-free, while the ventilated wire-mesh construction prevents damp odors and allows for quick visual inventory checks. For safe and effortless handling, the ergonomic drop-down front gate provides your staff with strain-free access when loading and unloading heavy bulk items.
